

LUMC Graduate school

PhD programme in Immunity, Infection and Tolerance

A specified PhD programme in Immunity, Infection and Tolerance can be followed within the LUMC Graduate school.

The main themes of the LUMC profile are of Immunity, Infection and Tolerance are:

- Auto-immunity and Chronic inflammation
- Immunotherapy and Vaccination
- Emerging Infections
- Immune metabolism
- Chemical immunology

Content and structure PhD programme in Immunity, Infection and Tolerance

PhD students working in the profile area “Immunity, Infection and Tolerance” are participating in the PhD programme of this profile area as part of the LUMC Graduate school. This PhD programme is also open for other interested PhD students of the LUMC Graduate school or of the Leiden University.

The PhD programme in Immunity, Infection and Tolerance consist of:

- Mandatory generic PhD courses
 - For information: <https://www.lumc.nl/research/graduate-school/courses/>
- Mandatory IIT specific PhD courses
 - Lectures
 - Immunology review club
 - Center of infectious diseases
 - IIT ‘pizza’ evenings
 - Advanced Immunology and Infectious diseases course
- Mandatory IIT specific PhD conferences/meetings
 - Three international/national conferences outside LU/LUMC
- IIT PhD-courses/conferences and generic PhD-courses/conferences in the “free area” e.g. MOOC transplantation, Basic Methods and Reasoning in Biostatistics Part B (Advanced), (IIT-related) FOS courses or SMBWO certification in Immunology, Medical microbiology or Parasitology.

For additional information please contact Dr M. Bax (m.bax@lumc.nl) or Prof R.E.M. Toes (r.e.m.toes@lumc.nl).
