Christian J. Strasburger, MD
Professor of Medicine, Chief, Division of Clinical Endocrinology, Department of Medicine for Endocrinology, Diabetes and Nutritional Medicine; Charité-Universitätsmedizin, Campus Mitte; Berlin, Germany

The Center for Endocrine Tumors Leiden and the Academic Residency program in Internal Medicine is very honoured to announce that the 7th October 2014 Jaap de Graeff lecture will be given by visiting professor prof. dr. Christian Strasburger.

Christian J. Strasburger, MD, is currently Professor of Medicine and Chief of Clinical Endocrinology at the Department of Medicine of Charite-Universitaetsmedizin, Campus Mitte, Berlin, Germany.

Dr. Strasburger’ s areas of research are pituitary disease, clinical and basic aspects of growth hormone physiology, analytical methods for the specific determination of hormone isoforms and related proteins, immune-endocrine interfaces and regulation of energy homeostasis.

Dr. Strasburger has published more than 200 original papers in high ranked journals, amongst which the New England Journal of Medicine, Neuron, and Journal of Biological Chemistry and is considered one of the opinion leaders in the treatment of patients with Acromegaly with the Growth hormone receptor antagonist, and in high-sensitivity assays for the detection of growth hormone doping in sports. He has served as the chief editor (2007-2011) of the European Journal of Endocrinology.

We sincerely hope that that you will attend the lecture,

Prof dr A. M. Pereira
Chair, Center for Endocrine Tumors Leiden

Prof dr. J.W. de Fijter
Chair Academic Residency programs of Internal Medicine
